Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Allowable Subject Matter

The indicated allowability of claim 8 is withdrawn. The indicated allowability of claim 8 is withdrawn in view of the newly discovered reference to Mazel (U.S. Patent No. 5,704,936). Rejections based on the newly cited reference follow.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 8 is rejected under 35 U.S.C. 102(b) as being anticipated by Mazel (U.S. Patent No. 5,704,936).

Mazel discloses a system capable of retaining a graft in a bone tunnel comprising a graft block (FIG. 9) having a proximal end and a distal end, the graft block including a distally facing, saddle-shaped graft support surface (FIG. 7, ref. #26) at the distal end for supporting the graft, the graft block being sized to slidingly fit within the bone tunnel, the graft block further comprising a transverse proximally-facing abutment surface, the abutment surface comprising a proximally facing open groove (see FIG. 7, groove formed at ref. #25b) formed transversely across the proximal end of the graft block, generally parallel to the graft support surface and located proximal to the graft support

surface; a tunnel attachment means (ref. #34) engageable transversely with the bone tunnel and the abutment surface of the graft block to support the graft block in the bone tunnel, the tunnel attachment means being located proximally of the graft support surface such that tensile forces on the graft result in compressive forces on the graft block between the graft support surface and the tunnel attachment means; and a pair of distally extending sockets (ref. #32) is formed in the proximal end of the graft block within the open groove.

Response to Arguments

Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

Claims 9-10 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 2 is allowable.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary Hoffman whose telephone number is 571-272-5566. The examiner can normally be reached on Monday-Friday 9:00-5:00pm.
